An Online Program For Patients About Hepatitis C Treatment

Visit: www.hcvandme.org

1. If you have been prescribed Interferon for the treatment of your hepatitis C, attend an online course with visual slides and voice narrated education to help you with side effects management.
2. Order materials directly online and FREE to you! Materials include notebook for lab tests, notes and resource lists; and Patient Starter Kit. Materials shipped will include the book titled Living with Hepatitis C.
3. Once you complete the online course, you will be able to print a Checklist of Course Points, and Certificate of Course Completion to give to your doctor or nurse for your medical chart.
4. Go back and visit the Right Start Course by subject. It is always available to review.
5. Complete, comprehensive and accurate video online to help you with self-injection training. Available to review over and over again when you need it most.

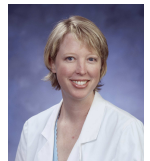

Convenient, Comprehensive, and Private
Right Start Online also includes educational materials about hepatitis C and the liver, web resource lists, success stories written by other patients, and NEWS about hepatitis C. All materials can be printed or emailed to a friend!

Nurse Advisor

Take the opportunity to be prepared. Support systems will be an important part of your success.

This program has been brought to you by the California Hepatitis C Resource Center, A Tides Center Project. The information you will review is not intended to be a substitute for the medical advice of your physician.
