

2011 Complimentary Membership

Welcome Registered Nurses, Nurse Practitioners, and other Health Care Providers

The National Nurses Advisory Council for Liver Wellness & Viral Hepatitis (NNAC) was created to improve hepatitis related health outcomes by initiating collaborative programs on three fronts:

- To promote education and prevention
- To improve the quality of care given to patients, and
- To serve as advocates for patients, researchers, and medical professionals

By bringing together nurses and health practitioners from various disciplines, we can identify gap areas in the current campaign against the epidemic of viral hepatitis.

Visit the NNAC Website: www.hepfi.org/nnac/index.htm
